

What's in the air you breathe?

If you don't have an air purifier, you and your family's lungs are the air purifier! From the floor of the House of Representatives -- indoor air pollution has been called "one of our greatest environmental health problems."

"Indoor air pollution is America's Number One Environmental Health Concern. Fifty percent (50%) of all illness is caused by indoor air pollution."

Environmental Protection Agency

"Indoor air pollution is wide spread. You are more likely to get sick from pollution in your home and office than from pollution in the air outside."

American Lung Association
